Reference: Positive advice Co2 3.1 audit – Contract NL/KPR c238241565

Dear Ms. Smulders,

With this, SGS Nederland B.V. declares that the (re-)certification audit on the standard Co2 3.1 on VDL HMI B.V. has lead to a positive advice of the lead auditor.

On 11/04/2023 our auditor, Mr. B. Boneschansker, performed a (re-)certification audit on the standard Co2 3.1. Based on his findings, he has given a positive advice concerning the certifiability of the system of the company VDL HMI B.V..

The next step in the certification process is the review by the certification board. If the auditor's positive advice is confirmed, the certificate will be issued. A negative review of the auditor's advice could lead to a follow-up visit before (re-)certification can be realized.

If you have any queries with the above please contact me.

Kind Regards,
SGS Nederland B.V.

With kind regards,
Jolanda Stillebroer
